4 OF THE BEST VEGETABLE SPECIALTIES.

Illustrated on back cover page.

Japanese Climbing Cucumber.

This new cucumber is a strong and vigorous grower, the vines attaining nearly twice the length of common varieties. The young plants are bushy, but as soon as they become well established they begin to climb, and may be grown on fences, poles or trellises, thus saving much valuable space in small gardens or in market gardens where land is dear. It is estimated that with this cucumber the product of a given area can be increased three-fold. The fruits are ten to twelve inches in length, of a fine green color; the flesh is thick and firm, never bitter, and fine for pickling, as well as slicing. It is very prolific, and the fruits, being raised well above the ground never suffer from wet weather or insects; vines are proof against mildew and continue bearing till late in the fall.

This is as we described this cucumber when we first introduced it last year and our trials the past summer have convinced us that it is worthy of a prominent place in our list. We sent out a number of trial packets and below we print a few of the reports we have received at the time this goes to press, and we advise our friends to give it a trial. Pkt., 10c.; 3 for 20c.; 7 for 40c.; 1/2 oz., 25c.; oz., 40c.

AGRICULTURAL EXP. STA., PURDUE UNIVERSITY, Oct. 10, 1893.—The Japanese Climbing Cucumber gave very good satisfaction. **J. TROOP, Horticulturist.**

PENN. STATE COLLEGE, Oct. 17, 1893.—I planted a few seeds of the Japanese Climbing Cucumber in my own garden and obtained some fine cucumbers from them. The vine was more vigorous and the leaves larger and greener than those of other varieties. **G. C. BUTZ, M. S., Horticulturist.**

EXCELSIOR, MINN.—The Japanese Climbing Cucumbers were the best in flavor I ever tasted. Were marvels of beauty and profuse in bearing. **P. M. GIBSON.**

HUNTINGTON, IND.—I think so much of the Climbing Cucumber that I shall grow the bulk of next crop of them. **G. SPICE.**

Crosby's Egyptian Beet.

The earliest beet in the market. A selection from that old market beet, Early Egyptian, which retains the earliness of the parent stock, and has added thickness, giving it a more desirable shape; it is the deepest red, almost black in color, and is of finer quality than the Egyptian, being sweeter and even more tender and smoother. The most desirable sort for small beets for early market. Pkt., 5c.; oz., 15c.; 2 for 25c.; 1/2 lb., 40c.; lb., \$1.15, postpaid.

SPECIAL OFFER: One packet each of above four kinds for 25c. postpaid.

Heroine Pea.

A medium early, green wrinkled variety which is a valuable addition to second early sorts. It grows very uniformly, about 2 1/2 feet high, bears profusion of large, long, pointed pods, containing from 7 to 9 large peas, finest quality. We recommend it with confidence to our customers, knowing it will give full satisfaction. Pkt., 10c.; pint, 25c.; quart, 45c., postpaid.

HAMMOND, MINN.—The Heroine Pea is a splendid sort. **J. A. RY**
FINDLAY, O.—Heroine is valuable for its productiveness and the weight and large pods. **J. P. B.**

MANLY, IOWA.—I liked the Heroine very much. **MRS. J. P. NIE**
ANTIGO, WIS.—Maud S. is a good Pea but Heroine does better here. **A. G.**

UPPER SANDUSKY, O.—The Heroine has a rich flavor. **HARLEY R.**
AUGUSTA, WIS. Nov. 3, 1893.—We consider American Wonder and Heroine excellent varieties of Peas to raise in this country. **O. W.**

SALT LAKE CITY, UTAH, Nov. 3, '93.—Heroine Pea did well here. **J. M. G.**
GALISBURG, ILL., Dec. 1, 1893.—The Heroine Pea bore an abundance of pods filled with large sugary peas. **IRA A.**

Brightest Long Scarlet or Cardinal Radish

The handsomest long Radish grown. A new sort of great fit for use in 25 days after sowing. The most remarkable quality, is its color, which is the brightest scarlet we have seen in any Radish tails are tipped white. This sort outsells any other long Radish that is competition with it on the market and is an extra fine sort for the home quality the very best. Pkt., 10c.; 3 for 20c.; oz., 15c.; 1/2 lb., 40c.; lb., \$1.15, postpaid.

ASHLAND, ILL.—The Brightest Long Scarlet Radish I consider very have planted them for two years and consider them the best, as they do not seed early, and remain nice and crisp longer than any other. **ROBT. ANDI**
UPPER ALTON, ILL.—The Brightest Long Scarlet Radish is a good variety, its beautiful bright color takes every time. **J. M. G.**

MILAN, Mo., Nov. 8, 1893.—Cardinal Radish is a very attractive variety good seller. **DAVID C.**

28 AWARDS IN HORTICULTURE
— AT THE —
WORLD'S COLUMBIAN EXPOSITION.

BULBS, • SEEDS, • PLANTS • AND • SUPPLIES.

"ALL FLORISTS' STOCK IN SEASON" has been our Motto in supplying this Trade for the past 16 years. The extent and growth of business which our Florist Customers have kindly so favored us with, should be some evidence that we have well kept this rule. With larger trade we have been able to make immediate direct shipments of each class of Bulbs and Plants from its native locality on ripening or maturing.

EAST AND WEST. The growth of our business has required a shipping and receiving office at New York City, and after conducting one for a year, we decided to open a complete store for Florists' Bulbs, Seeds and Supplies. This we now have at **No. 26 BARCLAY ST.** and through prompt direct shipments from there to our customers and carload freight rates to Chicago we can supply economically our customers in any part of the country. We aim to give careful, satisfactory attention to every customer and shall be glad to be promptly advised of any apparent failure in this direction.

• BUSINESS CONDITIONS. •

Terms on Florists' Stock: To customers of approved credit 60 DAYS, except on certain CASH items. Special 3 per cent. discount for cash in 10 days, (from these list prices only,) not from "Special" quotations and excepting. NET CASH items. Interest will be charged on overdue accounts.

New Accounts: New customers, if not already well known, will please send cash with first order and if desiring to open an account send good references, property statement or other information concerning their commercial standing as they may be able to furnish. This will avoid delay which is often very annoying. We cannot be expected to ship goods to those whose good standing is not known to us. For references please name bankers, wholesale merchants or other well-known business men with whom you have had dealings—such information will be held in confidence.

We prefer not to send goods C. O. D., but when wanted in that manner some money must accompany order; PERISHABLE stock, plants, etc., are POSITIVELY NOT SENT C. O. D.

Our Responsibility: While we always aim to have the best BULBS AND DORMANT PLANTS which each season affords from reliable houses, we cannot and we do not guarantee any of them to flower or produce a crop of flowers at prices here given, nor will we be responsible for the crop. We assume our customers to be acquainted with these conditions and if the stock is not accepted on such conditions, it must be returned at once and any money paid will be refunded. Live plants and like perishable stock should be sent by express; we cannot assume any responsibility whatever for safe arrival when such plants are ordered by freight by the purchaser. The remedy for loss must lie between the buyer and the Railroad Company, but we will gladly render all the aid we can.

Orders taken by our agents are always subject to approval by the house and no agent has authority to vary the above conditions.

GLADIOLUS CHILDSI.

This most important introduction of recent years is a class of hybrids originally raised by Max Leichtlin and originated and cultivated for some years in Argentueil, France, and for the past 6 or 8 years much improved and increased by Messrs. Hallock & Son. They are undoubtedly the most important and valuable introduction in bulbs which this generation will see. The stalks are tall, erect, often standing 4 to 5 feet high, with spikes of bloom over 2 feet in length. As soon as the price will justify, they will certainly supersede all other kinds. Price, per doz., \$3.00; per 100, \$22.50.

.. GLADIOLI, Snow White ..

The best white Gladiolus in cultivation. Nearly the entire flower is a perfect paper white with a slight cream shade on the lower half of each petal; of wonderful vigorous growth, giving an average of 3 stems to each bulb, many have five or more. Per doz., \$1.50; per 100, \$12.00.

VAUGHAN'S COLUMBIAN CANNAS.

We are headquarters for this stock, having shown at the World's Fair this season over 80 varieties of the New and Newest kinds, more than double the number shown by any other firm. We have now coming on 12 or 15 splendid kinds not yet in commerce. Our trade prices this season will be found very low and we will make special concessions to those of our customers east of the Ohio river to offset their express charges, since by combining orders to our New York store we secure lowest 100 lb. rate. Please let us have your list for special figures if you are buying in quantities. We received

15 Canna Awards at World's Fair.

Admiral Gervais.— $3\frac{1}{2}$ ft. Green foliage edged purple, flowers large, carmine with yellow center edged yellow. 35c.

Adolph Wieck.—4 ft. Flowers red, foliage green, a well known good bedder. Doz., \$1.50; per 100, \$8.00.

Admiral Courbet.—4 ft. Foliage green, flower lemon yellow marked with maroon. Doz., \$1.25.

Alphonse Bouvier.—Medal Awarded. $5\frac{1}{2}$ ft. Probably the grandest scarlet Canna introduced up to this time. The flower spike is very large and full and the flowers on each come in bloom well together. The color is a brilliant crimson and the individual flowers as large as the best of the newest kinds. The older flower heads droop a trifle as new ones come on, each strong stalk furnishing 2 or 3 clusters of bloom. Doz., \$1.75; per 100, \$12.50; per 1,000, \$100.

Baron de Sandrans.— $3\frac{1}{2}$ ft. Leaves green, flower spikes strong, flowers large, petals broad, brick red, edged yellow. Doz., \$1.25.

Brenningsii Variegated.—4 ft. Green leaves, striped and blotched white. The only Canna with marked foliage. Doz., \$1.25

Brenningsii.—Similar to above, plain green leaves. Doz., 75c; 100, \$6.00.

Capt. P. Suzzoni.—5 ft. A lemon yellow, dotted with dull red or chestnut spots. The flower is of good size, a little less than Madame Crozy in width of petal. The flower spike is long, standing well above the foliage and though not blooming in clusters as well as Florence Vaughan, yet the general appearance of a solid bed of it shown at the Fair, was decidedly yellow. Doz., \$2.00; per 100, \$15.00.

Childsii. (The Tiger Canna).— $3\frac{1}{2}$ ft. Foliage light green; flowers good size, clear yellow, brilliantly spotted crimson. This variety differs from most of the Crozy sorts in that it generally has four good sized petals instead of three making the flower seem larger than any other. Doz., \$1.25.

Chas. Henderson.—4 ft. This fine crimson was almost a medal winner at the Fair and though late flowering might rank a close second to the Bronze Medal varieties of our list. Each, 35c; per 100, \$3.00.

Cronstadt.— $4\frac{1}{2}$ ft. Fine purple veined foliage, large round flower, pretty rose lake color. Doz., \$2.00.

Duc de Mortemart.—4 ft. Deep green foliage, yellow flowers dotted over the entire surface with crimson. Each, 20c.

Duchess de Mortemart.—4 ft. Wide green leaves. Color yellow, strongly dotted and penciled with carmine. Doz., \$1.25; per 100, \$8.50.

Edouard Michel.—4 ft. Foliage green, flower orange. Doz., \$1.25.

Egandale.—Medal awarded. 4 ft. Purple foliage, strong, compact flower spikes; color, currant red. A bed of this on the lawn is very handsome because of harmony of leaf and flower and because of its brilliancy, it can be seen the farthest either in the sunlight or at dusk. We purchased the entire stock of this variety and imported and named it. Each, 25c; doz., \$2.75.

Explorateur Crampel.—5 ft. Foliage green, flower large and broad, color a clear vermillion scarlet with crimson spots distributed evenly over the petals, making a wonderfully brilliant flower. Flower spikes large but a little late in blooming and not so free a bloomer as Mme. Crozy. Deep colors like this and Egandale are the coming Cannas for massing. Doz., \$2.25; 100, \$17.50.

Ehemanni.—6 ft. Green leaf, clearly veined. Crimson flower, very distinct. The flower heads are well above the foliage. Doz., \$1.25; per 100, \$8.00.

Enfant de Cahors.—5 ft. Foliage shaded purple. Doz., \$2.00.

Florence Vaughan.—Medal awarded. $4\frac{3}{4}$ ft. This is undoubtedly one of the most distinct and beautiful. The flowers are the most perfect form, the petals are even broader than Madame Crozy, and more rounded at ends, which latter characteristic represents the best type sought for in the latest hybridizations; they are well opened and of the most brilliant golden yellow dotted with brightest scarlet, the largest of all Canna flowers, and are produced in constant succession the entire summer. This grand variety has attracted much attention at the Fair, as representing the best type of this class of flowers yet produced. Doz., \$3.00; 100 rate, \$25.00.

Francoise Crozy.— $3\frac{1}{2}$ ft. Foliage green, bright orange flowers, broad rounded petals. Doz., \$2.25; per 100, \$25.00.

Geo W. Childs.— $3\frac{1}{2}$ ft. Flowers are nearest like those of Mme. Crozy, but with more yellow on the throat and at the back of the flower; about two-thirds the size of the latter: the flower spikes are about five inches in diameter, symmetrical, longer and more gladiolus-like than any other variety, and very effective; the spikes stand well above the foliage, making it, because of its dwarfness, just the plant for the outer row in a Canna bed. Doz., \$3.00; 100, \$22.50.

Goury.—4 ft. Leaves broad, green, flower large and wide, red. Doz., \$1.50.

Guy d'Outremont.— $3\frac{1}{2}$ ft. New, green leaves, free bloomer, flowers large, petals long, salmon rose edged with yellow. Each, 40c.

J. C. Vaughan.—Medal awarded. $4\frac{1}{2}$ ft. Purplish foliage, flower large, clear deep vermillion orange, with a satiny lustre on the petals. We claim it to be the very best dark-leaved variety. The flower is larger than Cabos and fully as striking, contrasting brilliantly with the dark foliage. Stock scarce. Each, 50c; doz., \$5.00; per 100, \$40.00.

J. D. Cabos.—Medal awarded. $4\frac{3}{4}$ ft. Leaves green, strongly shaded purple, flowers large and round, color rich apricot, with deeper shadings attracts the attention of every one because of the novel and distinct color. One of the best. Doz., \$2.25; per 100, \$18.00.

Madame Crozy.—Medal awarded. 4 ft. Immense flower heads of the deepest vermillion, gold bordered, follow each other so rapidly that the plant is a was in bloom. Foliage green. This variety has done more than any other to give to Cannas their present great popularity. Doz., \$1.00; 100, \$7.50.

CALLAS.

LITTLE GEM, True.—One of the most distinct novelties lately introduced. It is a perfect Calla, growing only 8 to 10 inches in height and producing freely perfect miniature Calla Flowers of purest white. Plant grows very rapidly, making many offsets, which soon form blooming plants. This Calla, called Elliott's, was awarded the certificate of the Royal Horticultural Society in England in 1890. The country is flooded with other dwarf and half dwarf varieties, but all of them grow twice as large and tall as the true LITTLE GEM. Many Florists were deceived by spurious stock offered as Gem by supposed reliable wholesale dealers the past two years. Our stock is guaranteed true to name, having been imported directly by us through our agent who visited Mr. Elliott, the grower, in the Guernsey Islands two years ago.

Price, 2½ inch stock, per doz., \$1.50; per 100, \$10.00.

NANA.—The well-known HALF DWARF. Has been sent out spuriously as Gem. Best for bench culture for cut flowers. Price, 3½ inch pots, per doz., \$1.50; per 100, \$10.00.

Introduced to the trade by us in 1891 has met with much favor from all parts of the country, and will come into general and profitable use. Perfectly hardy and has been grown by a Chicago florist for five years in the open ground with no winter protection except forest tree leaves. From a bed, 150x4 feet, the grower sold 34,000 flowers in a season. This remarkably prolific habit fixes its value. It flowers well when grown naturally. The flowers are very large, double and strongly fragrant. They are of a very deep shade of blue and one or two petals in each are dotted with red. They remain in bloom about four weeks. Per doz., \$1.00; per 100, \$6.50.

SOME CHOICE ASTER SPECIALTIES.

Pure White Mignon.

This variety greatly resembles the Victoria Aster in growth and habit, but it excels in free bloom. The plants often bear fifty of the purest white flowers, globular and beautifully imbricated. This is undoubtedly one of the finest white Asters for cut-flowers. $\frac{1}{4}$ oz., \$1.25; pkt., 25c.

New Pink Mignon.—A new shade just like the above except in color, which is a lovely bright rosy pink. Trade pkt., 25c.

NEW Snowball or Princess Aster.—A most distinct and handsome new sort equally valuable for pot culture and cut flowers. It is a sport of that best of all white Asters the "Mignon," which it resembles in habit and size. It is a most profuse bloomer, a single plant often producing as many as 30 pure white flowers. The flowers are not quite as large as those of the Victoria Aster. Trade pkt., 25c.

Vaughan's Beauty.—A very handsome Aster, resembling Victoria Aster in shape and size of flowers, and grows about 2 ft. high. The color is the **brightest red imaginable** with a satiny gloss. One of the very best for cutflowers and bedding. Trade pkt., 25c.; $\frac{1}{4}$ oz., \$1.00.

CALENDULA ORANGE KING.

Calendula Orange King.

The grandest of all the double Pot Marigolds. Flowers of considerable size, much larger than any we have seen yet, and they are also remarkably double. The outer florets are slightly imbricated, while those of the center are incurved like the petals of a Paeony. The color is a rich dark orange, decidedly more striking than that of Prince of Orange. Oz., 25c.; trade pkt., 10c.

Candytuft New Empress.

One of the finest varieties in cultivation. The plant is of a very **branching habit**, and assume, when fully grown a very handsome candelabrum-like aspect. Oz., 40c.; trade pkt., 10c.

NEW HYBRID COLEUS.

For brilliantly colored foliage these have no equal. The Coleus seed we offer is saved from the finest collection in Europe. The result of this seed will surprise all, as most of our customers have no idea what beautiful pot plants these new Coleus make. Sow the seed now and have plants when the spring trade opens. Trade pkt., 25c.

EVERBLOOMING CANNA SEED.

This mixture is composed of seed of our own raising, seed obtained from M. Crozy and other renowned Canna specialists, partly from mixtures, and will produce varieties as choice as any of the new varieties and possibly some entirely new and distinct hybrids, since all the new Cannas, such as Madam Crozy, Childsii, Star of '91, etc., have been grown from seed. Such seed as we offer, saved from various strains, may be depended on for the very best results in this direction. Sow early as possible. Trade pkt., 10c.; oz., 40c.

Begonia Vernon.

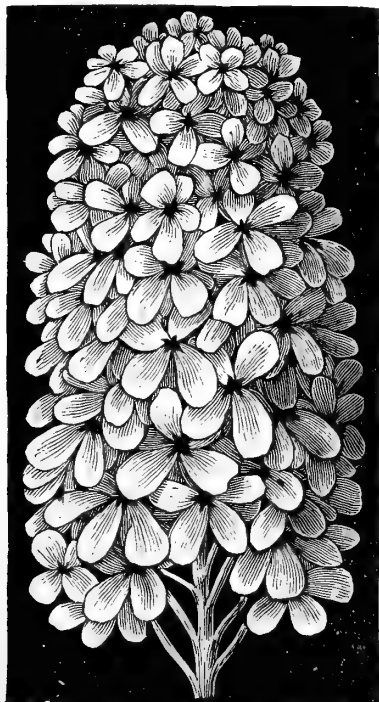

This beautiful new Begonia gave universal satisfaction last year. In habit and freedom of bloom it quite resembles the well-known Begonia Semperflorens; its numerous flowers are of a brilliant orange carmine color and the foliage a glossy red which grows more intense with the advancing season. Above all, **it blooms with the greatest profusion throughout the entire summer**, and is one of the most useful of bedders for parks and lawns, as well as highly satisfactory for pot culture. Pkt., 10c.

CANDYTUFT SNOWFLAKE.

Extremely freeblooming new sort. The plant grows about 7 inches high, forming a very neat, round bush covered with the finest flowers of the purest white. They are most valuable for pot culture, carpet beds and groups. **A continuous bloom** through the whole summer may be had by repeated sowings. Trade pkt., 10c.

Columbian Carnation.

This we offer for the first time this season; has been obtained by careful selection from the Margaret, and is **far superior** to it or any other Carnation seed ever offered; the flowers are of **larger size, better substance, greater doubleness**, and more varied markings and colorings, many having grounds and shadings of **yellow**, a color which is very rare in seedling Carnations. They will also, like the Margaret, bloom when only about three months old, and taken up in the fall the plants will bloom during the winter, yielding an abundance of very double flowers. VAUGHAN'S INTERNATIONAL MIXTURE.

WE have made personal inspections of the Pansy seed farms and trial grounds of England, Germany, France and America. It has proven more popular than we could reasonably expect and we may honestly claim it to be to-day *not only the best but the most widely known and admired*. It contains besides all the leading kinds of commerce, seeds of the Giant Bugnot, Cassier and Trimardeau with its flowers measuring three inches and more in diameter, and such beautiful colors as golden bronze, silver edged, marbled, mahogany spotted, claret red and many others.
